PROFILE

As a versatile professional with experience as a **Front-End Engineer** and **IT Business Analyst**, I have a deep understanding of software development processes as well as its business requirements. Holding dual Masters in Management and Bachelor-level degree in Web Development, I strongly believe in the significance of a customer-centric approach. My diverse background enables me to merge technical and strategic skills.

PROFESSIONAL EXPERIENCE

Front-End Engineer, *ekino*
02/2024 - now | Paris, France
- In progress…

IT Business Analyst | Web Developer, *Kenja K.K.*
09/2022 - 02/2024 | Tokyo, Japan (remote)
- Business Analysis: collected requirements from stakeholders to translate them in technical specifications ; collaborated with development teams to design IT solutions ; created detailed technical documentation
- Web Development: created Figma mockups and participated in the development of microservices for Kenja Rooms 4 (JavaScript, React)
- Testing: documented testing procedures for web and mobile ; built automated tests using Playwright ; handled automated and manual tests

Assistant Project Manager, *Groupe La Française*
01/2020 - 08/2020 | Paris, France
- Produced financial communication materials for “La Française Real Estate Managers” (quarter and annual reports for 21 real estate investment funds - around 100,000 copies)
